

## **SPECIAL BILLING SERVICES**

### **A. Call Accounting Report**

This service provides a detailed report of originating calls placed through each dial station within a customer account. The specialized report appears in a standardized form and is therefore applicable to all customers requesting the service. This reporting service is designed to meeting the demands of customers who have a need for more precise call accounting information for each dial station call. The information offered on this report includes, but is not limited to, the following reference items.

1. Time and date of call;
2. From number;
3. City called;
4. Number called;
5. Duration of call;
6. Amount of call before any discount (when applicable);
7. Type of call (i.e., direct dialed, operator handled, credit card, etc);
8. Class of call (i.e., station or person, day or evening or night/weekend, etc.);
9. Type of calling plan;
10. Jurisdiction of call.

The call detail information offered on this report form is designed to generally match the calls for which the customer is billed during a particular billing period on their monthly toll summary statement. The Call Accounting Report, however, is not a bill and may not exactly match the customer's actual bill. The service is available only where Company facilities permit.

	<u>Nonrecurring Charge</u>	<u>Monthly Charge</u>
Call Accounting Report	\$0	\$4.00

**EFFECTIVE: November 27, 2019**
