

# FAA and GCI Partner to Make Alaska Skies Safer

For the past decade, GCI has been installing FAA weather cameras on TERRA towers and other GCI facilities across the state. These cameras give pilots real-time information about weather conditions in some of the most remote regions of Alaska, and the results are amazing:

960

FAA weather cameras located throughout Alaska, many on TERRA towers.

85%

Reduction in how often pilots must turn around due to inclement weather.

66%

Reduction in weather-related aviation incidents.

*“These weather cameras have been life-changing for those of us who depend on air travel in Alaska.”*

*—Lee Ryan, vice president and pilot, Ryan Air*

GCI awarded 2017 Competitive Carriers Association (CCA) Industry Innovation Award for FAA partnership
